ABOUT ME

I am someone with a passion for technological advances and editorial novelty. Working as an editorial designer is something I have always wanted to do. I consider myself to be a responsible, disciplined, organized, social and proactive person that easily integrates into teams but is also able to work individually. I have a global vision for the projects and tenacity to follow action plans and goal achievement. I am easily adaptable, a fast learner and a creative individual.

EXPERIENCE

Graphic Design & Branding

Gabinete Técnico Echeverría

2018-Present

I am currently working as an intern in Spain's independent #1 branding studio. This is enabling me to partake in many projects of great magnitude both for national and international clients. From this position I have developed a good understanding of the different stages in project managing, the capacity to partner with demanding clients as well as an acute attention to detail to ensure the highest standards in my results.

English Formation

English Plus Language Services, S.L.

2016-2017

I worked for two years as an English teacher giving in-company classes, private lessons as well as regular programmed classes in two public schools of the Comunidad Autónoma de Madrid. In this position I learned to adapt my work to cater all the different needs of my students who were of a wide range of ages, levels and backgrounds. I also grew my abilities as a team leader and motivator and learned the importance of team empowering and stimulation.

Freelance teacher

2011-2016

I have many years of work experience as a private teacher for all kinds of students and subjects which has allowed me to develop the ability to be very thorough in all tasks that I undertake. During this period I became a very organized and methodic professional with a profound sense of responsibility.

Art sales and distribution

2011

I collaborated with local artist Amy Jackson in Laguna Beach, CA for the implementation of art courses at a basic level as well as the marketing necessary for the sales and distribution of her pieces in local markets. During said collaboration I acquired an appreciation for the important of brand-client relationships as well as the value of a good marketing strategy.
